RELATED WORK EXPERIENCE:

Marvel Studios, Walt Disney Companies, Disney +, Netflix, Amazon Prime Stream, TV One, Lifetime, BET, Bounce:

- Local 600 Digital Utility (Atlanta, GA 2021-Present)
 - Depending on the size of the camera department I sometimes work closely with the D.I.T (Digital Imaging Technician). My main duty is to remain attentive to batteries, being that many of the content we create are digital but still read to film at any given moment.
 - Often time more than one device needs to be powered at any given time whether it's a monitor or A, B, or C cameras including Preston handheld controllers. My main responsibility is overseeing that the entire "digital connection" throughout set is fully functioning and operating correctly. That varies from cameras to monitor's, transmitters to receivers, as well as the clear-comm communication systems.
- I'm also under the umbrella as a DIT Assistant, also variously referred to as a Digital Utility or Video Operator "VTR" Assistant, assists the DIT on-set deploying the live signal feed from the on-set cameras. At the DIT station, color management is applied and distributed to the various on-set monitors, including video village. This role can also help the DIT on-set to manage the RF requirements and the video transmitter(s).

- As a digital utility I'm an invaluable service providing batteries directly to the AC in an anticipated manner. Additionally, I'm. always prepared to run media from the camera to the Loader at the truck or DIT on set.
- Normally when taking on a new project, everyone has a different idea of the safest system for handling camera equipment and gear. I advise anyone coming up in the industry to NEVER DISPUTE but simply, be prepared to adapt, but at the end of the day, make sure your all on the same page. Most Importantly I remember to have fun and get to know my crew when time permits. As a Digital Utility, I'm granted the advantage of being able to offer beneficial support to the rest of the camera department!

Comcast Spectra:

- Video B-Camera Operator South Chesterfield, VA (December 2016 – April 2017)
- Assembled and disassembled video camera equipment
- Followed camera scripts; performed framing and capture imaging and actions to achieve specific visual look while maintaining focus

Fox Sports Radio 1340 AM & 96.9 FM:

- Sound Board Mixer Hopewell, VA (January 2017 –May 2017)
- Offered commentary and led reporting for college sporting events. Conducted sound checks of signals and air waves. Mixed music and adjusted volumes leading into scheduled programming. Announced station programming information. Researched sports topics of interest for comment and discussion during shows.

EDUCATION:

2017	Virginia State University	B.A. Mass Communications
